Subject: ANALYSIS ON CHOICE OF STOCKS

Dear Mr. Smith,

CMGG Investment Group is dedicated to investing your \$10,000 in the safest yet most profitable way possible. We plan on investing in blue-chip companies, such as Apple, AT&T, and Comcast, which will generate wealth through steady growth and consistent dividends. In the attached analytical letter report, you will see detailed research through written explanations and graphs that depict these three companies' current and future financial health. This letter is intended to introduce our analytical letter report regarding how we intend to manage your initial investment and answer any questions you may have.

CMGG Investment Group developed this project through extensive research from primary and secondary sources. Reliable sources such as U.S. News, Yahoo! Finance, and Nasdaq's current events have given us historic, present, and future data on how these shares have risen and fallen. In addition, these sources provided substantial evidence as to why investors should target companies that pay out dividends. As a result, we plan on creating a diverse portfolio of these reputable companies.

Thank you for taking the time to read our letter, which outlines our analytical letter report. If you have any questions or clarifications regarding our selection of companies or reasoning, please contact us via email or phone. We look forward to hearing from you.

Sincerely,

Co-Founders: Caprice Woods, Mikael La Ferla, Garrett Mease, and Grace Jung
